Good book. Good inspiration for outdoor projects.

It tells you everything you need for the area you're making the mosaic for. Excellent.

What a great book!

I loved the visuals accompanying easy-to-read explanations of each project.

It was perfect!!! Thanks

I LOVE this book! It is clearly written, logically laid out, beautifully photographed and just so helpful. He includes LISTS of what to buy, so when going shopping, it is so easy. I'm a beginning mosaic artist who has taken 4 different classes from 4 different instructors. If I'd bought this book first, I think I could have skipped many of those classes. The author has a wonderful way of explaining tasks and gives perfectly clear instruction. I've recommended the book to my other friends interested in mosaic art.

Hats off to Mr. Brody and Ms. Ashdown for giving us a comprehensive, technically correct and visually inspiring book about mosaics for the garden. Mosaics are labor intensive and when constructed using proper technique and materials they will last indefinitely. Yet few books clearly explain the how & why; consequently many folks have jumped in with the creative and skipped the all important technical realities of freeze/thaw cycles, appropriate adhesives and surfaces rated for their climate. *Mosaic Garden Projects* not only covers these topics in detail, the book includes 25 step-by-step projects with simple, easy to follow directions. The authors have done an excellent job of organizing the information and the photography is excellent. A must have addition to your library for anyone interested in mosaics for exterior display.

Mosaic Garden Projects had every bit of information I needed to try my first project - and an abundance of ideas to springboard my own creation from. Although the style of the illustrated work isn't anything like mine, I think the tools techniques presented are applicable to any style. This book has good information that I wouldn't have considered about using wood for outside projects, too.... I've seen old wooden chairs used for garden mosaic art & have wanted one ever since. Now, finally I have a hope of making my own!
