Customer Reviews

"DDxDeck will be perfect for a short flight, train ride or a quick study between patients in clinic!"--US Dermatologist Robert A. Silverman, M.D. "This is a fun way to test your knowledge of basic dermatology. For novices, it is a nice introduction to many dermatologic diseases before tackling one of the myriad of intimidating textbooks on dermatology."- Patricia Wong, MD (Stanford University Medical Center) Doody rating!

Thomas P. Habif, MD, Clinical Professor of Surgery (Dermatology Section), Geisel School of Medicine at Dartmouth, Hanover, NH, USA

I use this on a daily basis whenever some skin issue comes in- but I found there are plenty of things it doesn't cover. I have purchased Fitzpatrick's book to see if it fills in the gaps. This DDX deck is held together by a screw at the end- I have to tighten the screw every few days or it gets dangerously loose. There are some treatment recommendations on the backside, but they are often incomplete and I have to look up additional information elsewhere. Overall, I am happy with the purchase, but don't expect it to be your only Dermatology reference.

Amazing! Like paint swatches for dermatology disorders with very nice notes on back describing the morphology and other key points related to the findings that would clue you to this diagnosis and well at prescribing information. I took this to my clinical's for my preceptorship rotation and could line my finding up perfectly. These are really great if dermatology is not your strength and your trying to build on it. And you don't want to lug around a giant derm book. I HIGHLY recommend these!

This is a great and easy to use reference and is perfect for primary care settings. The front of each card has images and the name of the derm condition and the back has details about the condition, std. treatments, etc. as well as diff dx considerations. This can easily be taken with you to clinical sites if you're in your residency or on clinical rotations, as well as different sites if you work in various locations. I wish I would have had this during my FNP program & clinical rotations, it would have really simplified all things derm.

For those going into derm these flash cards are a must. Great resource to have!

good book

excellent, as described and worth the price!

Always in my lab coat as a quick reference. The pictures make it so much easier to identify skin issues as well as recommended treatments and patient education. If you are NOT a dermatologist or a skin expert, this tool is a life saver. It is especially useful in urgent care, pediatric settings, women's health, and fast-tracks in the emergency department.

Loved it. Only wished it was smaller to carry around during clinical.
