Product Dimensions: 8.9 x 2.7 x 11.1 inches

Shipping Weight: 10.2 pounds (View shipping rates and policies)

Average Customer Review: 4.7 out of 5 stars 5 customer reviews

Best Sellers Rank: #794,428 in Books (See Top 100 in Books) #110 in [Books > Textbooks > Medicine & Health Sciences > Medicine > Clinical > Hematology](#) #157 in [Books > Medical Books > Medicine > Internal Medicine > Hematology](#) #353 in [Books > Textbooks > Medicine & Health Sciences > Medicine > Clinical > Oncology](#)

Customer Reviews

"Well-written, authoritative and comprehensive...a useable, readable text that postgraduate trainees in medicine and surgery, fellows, and practicing oncologists will find useful in the care and management of cancer patients. It is well worth the price." *JAMA*, Review of the Previous Edition

every oncologist should have a copy. I use this textbook all the time as my oncology reference, very simple and easy to read and cover all the basics and updates.

I started reading this book together with Devita's textbook since the 1998, at that time Devita's book seemed to have the upper hand. I read Abeloff's last edition while preparing for recertification together with the Devita's book. The last edition of Devita was easier to read, particularly on the

basic sciences section. In this edition I didn't obviously read the whole textbook (I have another 10 years) but only a few selected chapters. I noted an improvement in writing style on this Aberloff's edition. The topics that I consult are easier to read. For a quick update this book should be a good purchase. For continuous up dates the Uptodate software is still the one to obtain. Before buying this title, I did read the topic on tumor micro environments and that facilitates the reading.

Wonderful book with all topics covered in one book. Takes little time to read but is thorough.

Excelent book, but with some damages of transit.

Good
