The All-New Woodworking For Kids

Synopsis

The All-New Woodworking for Kids takes an already popular book and gives it more: more projects children will love and more information in an expanded introductory section on tools, materials, techniques, and safety. Plus, this invaluable guide—one of the rare woodworking volumes created especially for kids—has been completely redesigned with thoroughly contemporary photographs. Of the nearly 40 projects included, 15 are brand-new and 25 have been redesigned. So now it's even easier and more fun for kids to handmake a bench for their own workshop, create a DVD storage cube that spins, build a doggie diner, or craft adjustable stilts, a box with a secret drawer, and many other long-lasting items.

Book Information

Paperback: 144 pages

Publisher: Lark Crafts; Ill edition (July 2, 2008)

Language: English

ISBN-10: 1600590357

ISBN-13: 978-1600590351

Product Dimensions: 8.5 x 0.4 x 9.9 inches

Age Range: 8 - 12 years

Grade Level: 3 - 7

Customer Reviews

Praise for the first edition: "An attractive, well-organized introduction; directions [are] clear and easy to follow." —School Library Journal

We just bought this book for our 13 year old son. He was very excited about the projects in the book. The projects include: A workbench (4'x2' and 30" tall), miter box, tool box, compass tool, bench hook, assorted bird houses, a squirrel feeder, standing cat scratching post, dog house for a small dog, critter observation station, bike stand, 2 toy boats, rope ladder (like the kind you would use for a tree house), a scooter, 8' balance beam, baseball shelf (holds bat, glove and balls), curio-type

shelf, jewelry tree, desktop organizer, study partner (holds your book open), table top easel, a heart box (the heart is added as a sort of handle, could cut a different shape, the box is like a shoebox), place card holders, key rack (holds keys), media tower for dvds or cds, travel checkers, airplane, drum, and a tessellation bird puzzle. The pictures are very good and clearly show the finished item. The directions appear easy to follow. Time estimates are given for each project varying from a few hours to 6-8 hours to 8-12 hours. Powering off the pc/video games and headed to Lowe's this weekend to get supplies for the workbench and the dog house....

Beyond birdhouses, this book contains a number of projects that kids will really want to build and use. Adult guidance will be required for younger kids, but these projects are well within the capabilities of middle school age kids, particularly if they have taken a decent shop class.

I ordered this book for my young teen granddaughter to inspire the use of a set of carpentry tools she received for the holiday. Wanted a book that would appeal to that age. The instructions are clearly written and cover carpentry basics—proper use of tools, safety, and planning. The projects are creative and practical, too. This would be a great book for a parent/grandparent with some woodworking skills to share with a youngster.

Purchased for my 8 year old for Christmas and he's excited to try to build some of these patterns.

Lots of full color illustrations and clever ideas. Instructions are straightforward and age appropriate. I got this as a gift for my nephew (10 years old), whose Dad already has a woodshop. The idea was that the book would provide ideas for projects they could do together, at a level where my nephew would be able to do most of the work, with some assistance from Dad. The book is perfect for that purpose, and I think they are going to have a lot of fun together with it.

Nice book and has easy projects for kids.

This is a wonderful book to teach basic woodworking skills to kids and others who needs basic knowledge. We're using it for homeschool instruction!

Wonderful book with projects for all ages on many different levels of complexity
