Synopsis

This is a "key idea" distillation of Richard Hooker's "Laws of Ecclesiastical Polity" the foundational theological text of Anglicanism. It takes the 1836 Keble edition of the "laws" and extracts from every section a summary of the important thoughts. This allows students to gain an overview of his thought before delving into the Elizabethan English of the original.

Russell basically provides the reader with his notes on Hooker's masterful work. It's a good read for the uninitiated and refers to the original work often. It encouraged me to read more of Hooker and others' writings about Hooker. The VEA Medea is a real foundation of Anglican/Episcopal beliefs.

This is a great introduction. It will really help me turn cc to the parts of the book I want to know more about. Someday I hope someone puts Hooker's work into modern English.

A good read.

On time. as promised.

The net-distributor has not yet gotten details on this book up for the reader to view. This is an "essence outline" of Richard Hooker's "Of the Laws of Ecclesiastical Polity" that distills down each subsection of all eight books into their core ideas. Think of it as a "Cliff's Notes" of the Laws. Until they get details posted here you can read excerpts and get more information at [...] Being the author I am rather partial to the book, you will have to rate it for yourself!

A great overview making Hooker accessible. A good book for those unable to make it through the original volumes in Elizabethan English.
