# Social Work Practice And Psychopharmacology, Third Edition: A Person-in-Environment Approach

## Synopsis

Praise for the Second Edition: This is a very well-written book, My students appreciated the down-to-earth style of writing. Many of my students are deathly afraid of topics that have anything to do with biology. [They] were assured by the lack of jargon and the fact that the chapters were written in a way that they could easily understand. I look forward to the third edition!

-Nathan Thomas, LCSW San Jose State University, School of Social Work

New findings emerge daily, and new medications hit the market every year. The nature of this topic lends itself to revision at least every 2-3 years to stay current and germane to current practice standards. The case studies are a nice way to transform and integrate clinical principles with social work practice. Students have enjoyed the book as a foundational text,

-Dr. Robert Mindrup, PsyD, University of Tennessee, Knoxville, College of Social Work

This comprehensive text prepares social workers to play a key role within an interdisciplinary health care team, emphasizing the importance of counseling for clients that take mental health medications as part of their treatment. The third edition has been fully revised to include new medications and reflect changes resulting from the publication of the DSM-5. Sample treatment plans, case examples, and a full glossary of medications have been updated, and the addition of a comprehensive Instructors Manual further enhances the text's value. Also included is information on prescription drug abuse, expanded discussions of psychopharmacological considerations related to gender and culture, and new content on medical marijuana, pregnant women, suicide warnings, Internet availability, and electronic records. The third edition also features a discussion of potential interactions with medications used to treat chronic conditions and emphasizes professional collaboration. The text is replete with guidance on common medicine-related issues social workers encounter in practice, including identifying potentially dangerous drug interactions and adverse side effects, improving medication compliance, recognizing the warning signs of drug dependence, and understanding how psychopharmacology can work in conjunction with psychosocial interventions. The text also addresses the particular needs of children, older adults, and pregnant women, and the treatment of specific mental health conditions.

**Key Features:**

- Addresses the role of medication from the perspective of social work treatment
- Delivers guidance on common challenges social workers encounter in practice
- Encourages and empowers clients to be active in their own treatment
- Identifies potentially dangerous drug interactions and adverse side effects
- Explains how psychopharmacology works in conjunction with psychosocial interventions

## Customer Reviews

Sophia F. Dziegielewski, PhD, LCSW, is Professor, School of Social Work, University of Central Florida, Orlando, FL. She is also Editor of the Journal of Social Service Research and has written over 145 publications, including eight textbooks, over 90 articles, and numerous book chapters. Dr. Dziegielewski is the recipient of several awards and has presented at numerous professional workshops and trainings on health, mental health, and preparation for social work licensing across the country. Throughout her academic, administrative, and practice career, she has been active in research and the protection of human subjects, specializing in the area of health and mental health. She has also been active in clinical practice, maintaining a current license in her field as well as serving as an expert witness in the courts. She has authored and contributed to a number of texts in the social work program at UCF, including DSM-5 in Action, now in its third edition (2015). George A. Jacinto, PhD, LCSW, CPC, is Associate Professor, School of Social Work, University of Central Florida, Orlando, FL. He is Chair of the College of Health and Public Affairs International Committee. Throughout his academic and practice career Dr. Jacinto has focused on mental health practice, with a current focus on geriatric mental health issues. He has received several teaching awards including the NASW Florida Chapter Social Work Educator of the Year in 2015. His research includes 17 articles, 10 book chapters, and numerous conference and community presentations.

This book was perfect for my class. It came in proper time and in excellent condition.
