The Nine Waves Of Creation: Quantum Physics, Holographic Evolution, And The Destiny Of Humanity

Synopsis

A guide to aligning your life with the frequencies of the Nine Waves of Creation – Explains the quantum physics behind the Waves of the Mayan Calendar system and how their holograms shape the human mind – Shows how throughout history each revolution in human consciousness has been driven by the activation of one of the Nine Waves of Creation – Reveals how we can consciously work to deactivate the negative patterns of the Sixth Wave and manifest the unity consciousness of the Ninth Wave

In the past few years the world has witnessed changes in social consciousness whose sudden development the ruling scientific paradigm has not been able to explain. These changes correspond with the activation of new Waves of Creation emanating from the center of the universe that influence human thinking. From the Big Bang to the present, these Waves guide the evolution of the universe and, through their holographic resonance with the human mind, profoundly shape revolutions in religion, technology, economy, and social consciousness.

Presenting a quantum-holographic perspective on world history and human consciousness, Carl Calleman explains the quantum physics behind the Waves of the Mayan Calendar system and how these Waves allow us to understand the shifting eras on Earth as well as the possibilities of the future. He describes how, prior to the activation of the 6th Wave in 3115 BCE, our social systems were based on a unified cosmic order, but the hologram of this Wave shifted society to an all-consuming focus on Good and Evil, leading to the rise of patriarchal religious structures, slavery, and warfare. He explores how later Waves and their new holograms helped humanity survive the negative effects of the 6th Wave, such as the Industrial Revolution of the 7th Wave and the Digital Revolution of the 8th Wave. In 2011, the 9th Wave was activated, bringing with it an accelerated push for a more egalitarian world, a rising awareness of unity consciousness, and access to the full power of all Nine Waves of Creation.

Calleman explains how our individual resonance with each Wave plays a role in the quality of our lives and how we must consciously work to resonate with the higher Waves. Revealing how we can become quantum activists in a holographic world by aligning with the 9th Wave, the author shows how we each can help manifest the destiny of humanity hinted at in ancient texts.

Book Information

Paperback: 320 pages

Publisher: Bear & Company (November 24, 2016)

Language: English

ISBN-10: 1591432774

ISBN-13: 978-1591432777

Product Dimensions: 6 x 0.9 x 9 inches

Shipping Weight: 13.6 ounces (View shipping rates and policies)

Average Customer Review: 4.9 out of 5 stars 10 customer reviews

Customer Reviews

“The Nine Waves of Creation presents a speculative cosmology supported by the recent discovery that galaxies in the universe are not located randomly but ordered in a way that radically challenges previous cosmological assumptions. If Calleman’s ideas—which are refreshingly wild but rationally argued—are even partially correct, today’s assumptions about the nature of evolution and the evolution of nature will need to be reconsidered.” (Dean Radin, Ph.D., chief scientist at the Institute of Noetic Sciences)

Carl Johan Calleman is a scientist and philosopher with a Ph.D. in physical biology from the University of Stockholm. Recognized for his theory that the Mayan calendar reflects the evolution of the global mind, he is the author of several books, including *The Global Mind* and *The Rise of Civilization*. He lives in Santa Fe, New Mexico.

Fantastic! The answers are here! After having read "The Purposeful Universe" this book was a "wrap up" of the loose ends.

The classic components of evolution theory fall apart like a house of cards with this precise, accurate and clear paradigm shift... this is a must read for the world, because it solves some of the greatest mysteries of humanity... to understand the vigesimal, exponential, non-cyclical, sequential progression of life evolution on earth is the first step of divine re-cognition in ourselves... and the beginning of a longlasting peace in our planet... if all of us are divine, who will dare to hurt anyone?

Not since Velikovsky’s *WORLDS IN COLLISION* and *HAMLET’S MILL* by Giorgio de Santillana has there been a work of such comprehensive scholarship like Carl Johan Calleman’s *NINE WAVES OF*

CREATION. This magnificent book attempts to prove that our universe was designed by a creator (or a Creator)-- as opposed to having originated in a series of blind bottom up processes. Professor Calleman starts off with the data from the WMAP and Planck satellite probes of the CMB (the cosmic microwave background) which, as everyone knows, took a set of baby pictures of our universe. Though the Big Bang occurred 13.73 billion years ago, the microwave radiation recorded in these probes was generated when the universe was just 300,000 years old. The WMAP and the Planck both show mysterious lines that are not caused by instrumental interference. Professor Calleman and a number of other analysts believe that these lines are evidence of a Central Axis ("Axis of Evil") 500 billion light-years in length, a kind of Weltasch (World Tree). This World Tree is the physical analog of the mythical world trees of the Mayans and the Vikings. Unfortunately, modern cosmology doesn't agree that these lines mean anything. They are thought to be "psychological effects," a kind of Rohrschach test. Professor Calleman says that this judgement is based on preconceived dogmatic materialism. Mainstream science is engaged in a cover-up. In any case, the Axis of Evil needs to be studied with an open mind. So far nothing has been proven and the burden of proof is on Calleman and other scientists who think like him. Professor Calleman is one of the world's foremost experts on the Mayan calendars (there are five of them). It is in this capacity that he discovered that the Mayans date our universe to 16.2 billion BC (which is close to the 13.73 billion BC revealed by the Wilkinson probe) and that they divide time up into nine periods with an associated fractal scaling factor of 20, i.e. each period is twenty times shorter than the previous one. Calleman claims that the various ages defined by the Mayan calendar correspond to the nine major periods in the creation and subsequent evolution of the universe, e.g. creation, the origin of simple bacteria, the origin of eukaryotic bacteria, the origin of multi-cellular organisms, the origin of mammals, of hominids, etc. These waves are pilot waves that guide evolution. This is standard Creationist doctrine. Although each of these waves does the job of a divine or semi-divine being, there is a physical wave associated with each historic breakthrough. Professor Calleman speculates that there are waves far larger than the recently discovered gravitational ones picked up in Feb, 2016 by the mile long LIGO detectors. Some waves are not measurable in meters or kilometers, but in hundreds of millions of light years! The longest wave, the wave of creation, he says is in fact 100 billion light-years across. This too is highly speculative. The gravity waves discovered by the LIGO detectors were caused by very massive colliding black holes at a distance of a few hundred million light-years. Where are the gravitational waves caused by the Big Bang? Somehow they must have been dissipated during an Inflationary Period which, in about a trillion trillion billionth of a second, caused the universe to expand from little more than the Planck Length to around a billion light-years

across. It is vain to talk of quasi physical waves that have left no trace. The NINE WAVES OF CREATION is a wild book. It sets out to challenge us and it forces us to think. You may not like all its conclusions, but it must be taken seriously because Calleman is an important writer for anyone looking for all the answers.

This book is a great read. Putting science and religion on the same time line is an interesting perspective!

Everything was as it should be if not better.

Brilliant look at Mayan cosmology

I enjoyed reading this book. It is a great explanation of the Nine Waves. I plan to mention it to friends that I think would resonate with what this book has to offer.

very interesting
