Synopsis

Learn my tactics to earn as much as \$60 per hour of my time, working from home, with nothing more than my computer and an internet connection - no prior experience required! I work WHENever and WHEREever I want, plus take time off whenever I please. Want to join me? And don't worry • I'm not about to suggest that you start writing books, become a blogger, build websites, start a Multi-Level Marketing business, fill out a pile of mind-numbing surveys, sell stuff on eBay, or bug your friends by trying to sell things to them. My system is much easier to get up and running - it can be set up within 1 week - and can put cash in your pocket a lot sooner than most of those other options, plus has little to no start-up costs. Imagine having the ability to earn a little bit (or maybe a LOT) of extra cash each month, without having to get another job. Wouldn't it be great if you could earn this extra cash on YOUR terms and: work when you want, and where you want finally have the extra cash you need to afford a few luxuries in your monthly budget be able to take time off whenever you want, without having to beg for permission from your boss and arrange for it weeks or months in advance be able to double, triple, or quadruple your hourly wage once you learn to be more efficient at your work, rather than having your boss reward you with more work and zero extra pay This book will teach you my method for doing all that and more. I've used this system anywhere from North American suburbia to Bali • how many JOBS can offer you that kind of flexibility? The ability to design your dream life, wherever you want it to be? Read this book and find out how to do it! I've earned money everywhere from home on my couch in suburbia to a cozy coffee shop overlooking a gorgeous marina in the tropics. This book will show you how. If you're looking for real ways to earn money from home, a system that's flexible and works whether you're just doing it in your spare time as a side hustle, or turning it into a full-time gig, you should read this book. I know this system works, because I use it even now. You could be next. Read this book and find out how to do it.

Avery Breyer is the multiple best-selling author of the Smart Money Blueprint Series. Avery has been featured on live radio, WOR 710 [The Voice of New York](#), [on The Financial Quarterback](#) which is hosted by 5-Star Wealth Manager Josh Jalinski. Avery has also been quoted on MSN Money, GoBanking Rates, Fool.com, Time.com and Nasdaq.com. Avery is passionate about helping people to take control of their money and create the life they want!

I read this author's first two books and loved them for their down-to-earth common sense and their gently encouraging tone. It's rare for an author to approach the uncomfortable subject of personal finance in such a way that excites readers instead of frightening and depressing them. So I was eager to read her latest, although I wasn't sure that I would want to review it. After all, I know a bit about personal finance (including credit scores) but I know nothing at all about on-line writing. But that's the beauty and value of Breyer's books. She assumes that you DON'T know anything and walks you through it step by step. In this case, she's teaching you the system that she's evolved for making money writing articles and web site content for companies that don't have time to do it themselves. In other words, free-lance non-fiction writing. I'm leery of get-rich-quick schemes, but I don't think this falls into that category. For one thing, this is not an opportunity that's open to everyone. In order to cash in, you must write good (i.e. grammatically correct) English and it must be standard American English. You must also be a reasonably proficient typist or it will take you so long to pound out an article that your hourly pay scale will be laughable. As this author points out, you can teach yourself good grammar and fast typing if you're motivated to do so. If I have an argument with the book it's that it glides over the research part of the system. Unless you're already an expert on the topic that the client wants you to write about, you'll have to research the subject. So your out-put will be contingent on how fast you type, but also on how fast you read and absorb knowledge and how your brain processes knowledge. Can you read an article quickly and summarize it so that you tell the important, interesting facts? Can you read several articles quickly and collate the information in them and combine it into a brief, readable summary? Are you naturally curious? Do you ENJOY learning about new things or will it be drudgery? For every writer who

makes a fortune with a best-selling novel there are thousands of writers who make a living writing for newspapers, advertising agencies, trade or company magazines, or some other form of on-demand writing. Some are employees and some are free-lance. Some have an office and a parking space and benefits and some work in their pajamas. This author has discovered a new wrinkle on an old idea. The possession of a computer and internet access means that everyone has the potential to cash in on the demand for on-line content. You're the only person who knows if this is a viable choice for you. However, if you want to try it, I don't think you could do better than to start with this book. Ms. Breyer is a born teacher and she gives her readers the benefit of all the experience that she's acquired over the years. This is a business with few (if any) start-up costs. No franchise fees. No \$4,000 "seminars." No hype. Just turn on your computer and start learning and (hopefully) earning. You're in good hands. Having read and enjoyed this author's first two books, I was looking for the next one in the series and happy to pay 99 cents for it. I've already recommended it to several friends who are looking for ways to make money at home. I'll keep you posted.

I enjoyed reading this, but that is as far as it goes with me. The author tells you what this magical secret is, which if you haven't heard of of SEO, would be. A general over view of how they did it. Not much step by step. Not much information on how to do it or do it proficiently. Then jumps into a gloss over of starting your own freelance gig. This is a great introduction and breif overview. Not a step by step guide. Your computer will not be a money making machine after only reading this book. Use your computer to Google SEO or SEO books / courses. You could probably even type SEO into and see what the top selling books are. I would not spend my money on this if I could do it over again.

This book is very clear and easy to follow, very good tips and tricks about how make money, the steps explained here can easily been applied to others areas as well. My only concern is the title of the book do not really reflect its content, should be something more "Write and Get paid for that", "Howe to write SEO content and get pay" or something like that, Other than that I really recommend there book if you want try this book going to guide you and put you on the right track. Thanks to the author for share his knowledge and spent the time in write this book.

If you get stuck in the details of just getting started, this book is great. Avery Breyer's book has many tips, sites for resources, as other books do, but also includes what to do each day to get the

business off the ground. Very helpful. I will check back in after I have tried this.

This is a well written no nonsense guide to writing great SEO articles and getting paid for doing so. I can't wait to get started!

I absolutely loved this book. I am a freelance writer and I was looking for a way to boost my income. Avery Breyer provides a very concise explanation on how to do this. I am going to implement her suggestions this week. It is not about getting rich quick (thank goodness). It is a creative way to extend your freelance writing business. Don't miss out on this one.

I wasn't looking for a book on "Making Money." I was looking for one of my books and I saw Avery's book. It intrigued me so I purchased it after reading inside. I read the book in one sitting. While reading the book, it came to me while reading her book that I could write 100 articles in the time it takes me to write a book. I am currently writing a book that's about 98% finished. When I finish that book I'm switching to article writing! Avery shares all the information you need to succeed. Go for it. I can't think of any better way to start 2017 than buying and reading this book..

Very good intro to a subject very new to me and most people who will order this book. I got the hard copy book rather than the kindle version, and read it within the first two days, then proceeded to outline the major points. I intend to follow up on this program, and we'll just have to see what follows. Don't need to make a living at this, but some additional retirement cash would be good.
