I used this atlas to teach two rising fifth graders about geography. It was just enough information on countries to introduce geography to children who knew nothing of a world beyond their inner city neighborhood. It was a good teaching aid.

Grandson, seven, loves this book, excellently done.

It was a great birthday gift for my nephew.

My kids love this book

Wonderful book for children learning about the world.

A+

Goes great with the globe I purchased for my grandchildren. It helps by enhancing the globe, giving more insight through colorful photos on the places, people and countries.

Excellent beginning atlas for children. My five year old daughter loves looking at maps. She got this for Christmas, and has practically worn it out already. It has easily readable facts for each continent, and nice colorful pages.
