Customer Reviews

Nice book (although, as with any oncology text, not up-to-date by the time it's published). Just be aware the the first 2/3 of the book, although important info, is not specific to leukemia/lymphoma. For example, there's a chapter on response assessment, and they discuss RECIST. Just a brief paragraph on lymphoma response criteria and really nothing re: leukemia and MM response. It's only the last ~3rd of the book that covers leukemia and lymphoma (and a little myeloma).
