Age Range: 5 and up

Grade Level: Kindergarten and up

Customer Reviews

For over 35 years School Zone has been an innovator in children's educational products. School Zone creates a wide range of educational resources to support every curriculum.

This book is huge and in my opinion really covers everything a child needs to learn. There is a Table of contents that separates each subject. Worksheets in each subject start basic to more complex. I bought this for my pre-schooler to get her ready for kindergarten quick. I don't believe this will be over her head. Lots of fun pictures and colorful pages. Also pages kids can color. Teacher key in the back of book too. I find it unnecessary but it does take up a lot of space in book.

I bought this book for my 4 year old son who is pre-k aged to work from at home. After carefully considering the pre-k book and the kindergarten book, I chose the Kindergarten one because he is advanced and I felt he had already mastered the topics in the pre-k level book. I absolutely could

not be happier with this book! It is everything I hoped it would be and really surpassed my expectations. It challenges my son just the right amount so that he isn't frustrated, but it isn't too easy either. This book covers a wide variety of topics from letters and their sounds to handwriting, counting, math, learning shapes, measurements, patterns, counting coins, reading etc. There is so much to do and so many different activities for each topic that it even kept my ADD son's attention for a very good length of time. Even better, each topic contains many different kinds of activities to ensure the child fully grasps that concept. The pictures are adorable and are very appealing. They are age appropriate and they are very bright colored. The book is very thick (320 pages) as there is a lot of material, but it is good quality and the pages are easy to write on with pen, pencil, crayon and marker. I love that there is even an answer key in the back of the book in case an independent learner wants to check their own work. There is also a certificate of achievement for the child once they have completed all of the lessons! How exciting is that?! I am excited to continue working with my son on this book and will continue to buy the higher levels once he finishes this one. I highly suggest to ALL parents!!

My 5 year old loves this book! It was purchased to supplement her school work as her teacher does not give homework. The book is in sections. She had finished the writing section and is now in shapes. She has fun with this book and I would recommend this to someone who wants to have a fun workbook for their kiddo.

My daughter loves this book. She works in it all the time and helped to advance quicker than some of her classmates.

I was so excited when I received this book! My daughter seemed to be excited as well when she saw it because of the very colorful pages. Some of the topics in there are a bit too easy for her age group as she had done those when she was in pre-kindergarten; she is now 4 and is in kindergarten. I guess I can call those refreshers. I told her to do those easy ones on her own time lol I figure the curriculum in my country may be a little different than that in the USA. All in all it's a great book and I can't wait to get my daughter started. This is a good way to keep her busy during the summer break.

This book is great! I love the variety of activities and the extremely colorful pages. It has 320 pages. It covers letter sounds, handwriting, shapes, counting, patterning, colors, 3D shapes, volume,

weight, sizing, and tons more. I'm using the book to sharpen my daughter's skills before she starts kindergarten. We just do a page here and there, but she loves to learn. She loves doing the work in this book. She just thinks it is something fun to do!

Good book my only complaint is that I would have liked more complex things in here because it covers a lot of pre-school things and my daughter was well advanced and needed things more set for kindergarten but it did have some of that too so next time i will just buyva grade up instead. But worked good for the summer to keep things fresh in her head!

The worksheets are colorful and have wonderful skills to practice. However, I purchased this for my 4-year old boys as practice sheets to prepare for Kindergarten. I feel like most 5-6 year old Kindergarteners would be too advanced for this. Also, I was surprised that it wasn't as BIG of a book as I was expecting.
