Claire Advokat received her Ph.D. in physiological psychology from Rutgers University, following which she completed an NIH Postdoctoral Fellowship at the College of Physicians and Surgeons of Columbia University in New York City. She then served on the faculty of the Department of Pharmacology at the University of Illinois Health Sciences Center in Chicago. In 1989 she joined the Department of Psychology at Louisiana State University, where she served as the Faculty Senate President (2004 2005), retiring in 2012 as an emerita professor. Her research area is psychopharmacology, specifically drugs used in the treatment of psychiatric and behavioral disorders. She has published over 80 articles, and received funding for her studies from the National Institute of Drug Abuse (NIDA), the Spencer Foundation, the Board of Regents of Louisiana, the State of Louisiana, and the pharmaceutical firm NPS. She received a university teaching award in 2005, served as an ad hoc reviewer for 20 journals, and serves on the editorial board of *The Journal of Attention Disorders*. Joseph E. Comaty received his M.S. in experimental psychology from Villanova University; his Ph.D. in psychology with a specialization in clinical neuropsychology from the Rosalind Franklin University of Medicine and Science, in Illinois; and his postdoctoral Masters

Degree in clinical psychopharmacology from Alliant University/CSPP in California. He is a licensed psychologist under the Louisiana State Board of Examiners of Psychologists (LSBEP) and a licensed medical psychologist under the Louisiana State Board of Medical Examiners. He retired from the Louisiana Department of Health and Hospitals, Office of Behavioral Health in 2013 where he was the Chief Psychologist and Medical Psychologist and Director of the Division of Quality Management. He is an adjunct assistant professor in psychology at Louisiana State University (LSU) in Baton Rouge and serves as emeritus faculty of the Southern Louisiana Internship Consortium (SLIC) in psychology at LSU. He has served as a member and chair of the LSBEP; he is a member and current chair of the RxP Designation Committee of APA, and a site reviewer for APA's Committee on Accreditation. He is a member of the Model Act and Regulation Revision Committee for the Association of State and Provincial Psychology Boards (ASPPB). His research is in the areas of behavior therapy, pharmacology, and clinical psychopharmacology. He is the author of over 50 articles, book chapters, and presentations. He has served on federal grant review committees and has been a reviewer for Psychiatric Services; The Journal of Gerontology: Psychological Sciences; and the Journal of Behavioral Health Services and Research.

This new edition is a great update. The information is as up-to-date as can be expected in our drug influenced culture and well written and helpful enough for any education level regarding the power of drug actions on the nervous systems--including the brain effects with biopsychology implications. I have appreciated how it touches on the social/emotional and cultural implications of each drugs' use as well. This text has been of great personal help to me as a licensed Substance Abuse Disorder Counselor to understand the question of "Why can't they just quit?" It has met and exceeded my expectations.

Given that my previous edition was the 2nd Edition, this 13th addition "caught-me-up" on about 30 years of research and some of the way language has changed. For example, we no longer refer to a junkie as an addict. We have removed both terms: junkie and addict. We now refer to such persons as having a "substance use disorder." Despite the Federal Agency which uses the term "drug abuse," political correctness has gone far in trying to eradicate the use of the term; "abuse." The book features new chapters, new substances and the results of brain site activity and brain and other receptor findings.

Bought for a psychopharmacology course. This book has a thorough explanation of a variety of

drugs and how they work. I never keep my textbooks, but I held onto this one! Seriously the bible of drugs and their effects.

I have an older version, the update is good.

This has EXCELLENT information about psychoactive substances. I'm using it for reference with my therapy practice when alcohol and drug issues arise and I need some more information. It's very detailed and can provide some great information. For me, it's been personally very helpful.

I am a nurse in an addiction certification course. I am so impressed with the accessibility of information in this book. I have been exposed to this info through my training but this textbook is so excellent I really feel like I am LEARNING it! Great resource - very up to date.

not a good resource. hard to read and comprehend.

This book is extremely hard to follow. I was not taking a class to be a neurologist, just to understand what drugs do to and how they interact with the body.
