Guitar Sessions -- Led Zeppelin Acoustic: Book & DVD

Synopsis

The Guitar Sessions series features songbooks centered around detailed instructional video lessons that teach how to play rock 'n' roll's greatest songs, shown step-by-step by knowledgeable guitar-slinging hosts who then perform the music in its entirety. With *Led Zeppelin: Acoustic Sessions*, you'll learn riff by riff how to play all of Jimmy Page's guitar parts in Led Zeppelin's most classic acoustic songs, including Jimmy's famous alternate tunings and even some of the must-know mandolin and electric guitar parts. In addition to the DVD lessons, this book also includes detailed written lessons and TAB examples that match the DVD; our exclusive TNT 2 software that allows you to practice to sound-alike recordings of every song, alter the mixes, loop sections, and change keys and tempos; play-along MP3s, for practice away from the computer; and full PDF transcriptions of every song in TAB and music notation. Titles: Babe I'm Gonna Leave You * The Battle of Evermore * Black Mountain Side * Bron-Yr-Aur * Going to California * Hey, Hey What Can I Do * Over the Hills and Far Away * Ramble On * Stairway to Heaven * That's the Way.

What a great multimedia package of Led Zeppelin acoustic guitar music! The TNT2 software has been updated since initial release and provide the ability to loop song segments, and mute or solo the instruments and/or vocals. The DVD guitar instruction is better than any you'll find on YouTube. MP3 tracks are included in both the full and play-along format, and sound great! The book contains

the song background info about the original recording, chord boxes, intro and verses, and signature riffs categorized by the guitar sessions takes that would of made during studio recording. Finally are the original recording transcriptions with notes and TABs in PDF format on the DVD+ disc; a first from any music publisher! Kudos to Alfred Music for enabling me to re-print copies of the sheet music that I bought. Highly recommended!

Very detailed and nicely printed manual on how to play a lot of Zeppelin acoustic classics. They went with some low-hanging fruit here (songs that haven been covered a 1000 times before), but there are some gems that don't get much attention. Recommended!

Love this book (and DVD). It has accurate tab and easy to follow video instruction on DVD. What I really like is that it gives a short musical and historical introduction for each song. You will also find the type of guitar Jimmy Page used for the recording and the amp settings. This is absolutely what I was looking for.

This is very well done instructional material. The instructor is clear and precise. The tab is broke into sections and full song. The only issue I had was the packaging of the DVD. The sleeve was too tight for the DVD and the glue used to seal it was on the read side of the DVD. I used a little WD-40 to clean it hoping that it would not ruin it. That worked fine, but I really should not have had to do that to get it to work.

This is what every TAB book should strive to be!

This is a great book with DVD and the TNT software besides Tabs for all the songs too. The guy on it playing does most of the songs good he just plays Over the Hills and Far Away to fast in sections and the D chord rhythm is not done right. Just listen to the song you will find out what I mean by that, but I have played guitar for a long time and can hear these things other then that all the songs are done right. Oh, they do not say who is playing the guitar on it strange most the time they will let you know.

Zep, enough said.

I bought this at my local guitar center as an impulse buy, and boy was it worth it. As the other

reviewer mentions, the DVD that breaks each song down as well as the TNT software that allows you to loop specific parts and even slow the tempo down make this purchase more than worth it. As an intermediate guitar player I was able to learn Going to California in just two weeks working on it for maybe 30 minutes a night after work. I wouldn't have been able to do that with just a book of TABs. I will definitely be checking out some of the other titles.
